- **bose wave manual controls, bose wave manual controls, bose wave manual controls.**

The Bose Wave radio features awardwinning Bose waveguide speaker technology for clear, highperformance sound. Optional Bluetooth adapter lets you wirelessly stream music from your smartphone or tablet, too. And it blends in nicely with any decor. So easy you can do it in your sleep. Nice and practical. The Wave radio IV features awardwinning Bose waveguide speaker technology for clear, highperformance sound. For convenience, there's a slim credit card style remote with station presets. You can also touch the radios top for on and off, or to snooze the alarm. Also features a clock, dual alarms with gently rising volume, an auxiliary input and a headphone jack. To wirelessly stream music from your smartphone or tablet, simply add the optional Bluetooth adapter. Included Wave radio IV; power cord; remote control. Amazon calculates a product's star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers, and factors that establish reviewer trustworthiness. Please try again later. I believe my previous one was a second generation model. I need a second one and upgraded to this model. They have really made an improvement with generation 4. The bass this produces is amazing for the size and the treble is crystal clear. At low volume, like for sleeping, it sounds really nice but you can also crank it up and fill the whole house with sound. The new design is really sharp looking as well. Only complaints are the fact that it doesn't have any controls on the unit, everything must be done from the remote other than turning it on and off and the fact that it doesn't fade the volume in and out when turning it on and off like the older models did. Neither of these are show stoppers though. Perfection! Yes, more expensive than most but I've found that in this case for sure, you get what you pay for. <http://applemedic.com/userfiles/conairphone-user-manual.xml>

I do agree with many reviewers that, although the power cord serves as an external antenna, many people need an extra antenna for receiving better reception or more stations. I do receive a few stations perfectly but I know that if I purchase an antenna I will receive more stations. For the price of this radio I think Bose should have included an extra antenna. I think I will go ahead and order one now. Even with this one minor complaint I still give this radio 5 stars. I've tried several inside antennas without any success. While the sound is good with external devices connected the radio is crap. Don't waste your hard earned money. Regards, Bose Disappointment It shuts off randomly after less than a month of purchase. Missed the return date by one day. Just what I was looking for. I do wish I had bought one with CD player, to hear more music that I prefer, but chose this for compactness. The remote is tiny and the only way to control the radio, which some reviewers have mentioned, but I just lay it on top of the radio and that's where it lives so I can always find it not a problem for me. We didn't need the CD player on. We didn't need the CD player on this one because we have it up high in an outside covered area. The sound is great and the remote works perfect even from a distance where we have patio chairs. The price is great and it has the same wonderful sounds that our other two Bose Radios have. We have only BOSE in our home and 100% happy with all three. Will be back if we decide to put in in my husband shop. As soon as I can afford it, I'm getting another for my downstairs. Does not have much range. Pulls in only close local stations. All others have static, ranging between slight annoying and impossible to decipher words level all ranges for SAME station. Wanted this radio for so long and it was so expensive I am deeply disappointed and disillusioned. My main disillusionment is with Amazon though.

I paid top price and shipping box was labelled from the Returns and Replacements Dept. Buyer beware. Sorry, we failed to record your vote. Please try again Sorry, we failed to record your vote. Please try again We are totally happy with this radio. I was very concerned because we have pretty poor reception. We live in a very remote area, but the Bose has no trouble at all bringing in our one station. Other cheaper radios we have had in the past were a constant problem, and we were always trying to tune in the station, and they never worked very well. With the Bose we get an excellent signal with no additional antenna, just the cord serves as the antenna. We never have to fight with the tuning, and I can hear it right across the room, which I could never do before. We couldn't be happier with this radio. Sorry, we failed to record your vote. Please try again I myself have two of them one. I have also computer speakers and noise cancelling earphones. I would recommend all Bose products. Sorry, we failed to record your vote. Please try again My first reaction was to have it repaired and I may still find someone able to do it. In the meantime, I bought a Wave Radio IV and I am very pleased with it as I was with my previous one. I listen exclusively to classical music. This small radio is amazingly sonorous. I highly recommend it. Sorry, we failed to record your vote. Please try again I choose the basic one that I can add different option to optimize it, with a low price that you give me the option. And now I can enjoy every day my new Bose Wave Radio. Thanks Denis Regis excuse my English Sorry, we failed to record your vote. Please try again Bose is synonymous with high quality products and this one is no different. I purchased this for my fiancée for Christmas and I can honestly say I'm considering buying a second. The sound is phenomenal. We love listening to it in the kitchen and now I need one for my basement rec room.

It might be a little pricey for a radio, but when you listen to it for the first time, you'll forget all about what you paid for it. Highly recommend this product. Sorry, we failed to record your vote. Please try again I have a hard time with the setup at times. Very good product. Got this one because of the auxiliary jack to play my MP3 player. Sorry, we failed to record your vote. Please try again I ended up returning it thought because I thought it had a CD player built in which it does not. Sorry, we failed to record your vote. Please try again The sound is wonderful, it links perfectly with the iPod. We live very rurally and normally have poor radio reception even with an antennae, but not with this radio. Stations we like come in perfectly. Very happy and would purchase this item again. Sorry, we failed to record your vote. Please try again Full sound for a compact unit. Best of the best. Sorry, we failed

to record your vote. Please try again No justifica el precio.Sorry, we failed to record your vote.
